

1. OBSERVATIONS IN WORD EDITOR:

1. Document prepared in word editor should be exported, to save it as a word doc/ pdf doc.
2. Requirements updated for the current build in word editor should be fetched and change notice of SSS, SRS & other applicable documents to be generated as per the change notice template given.
3. After creating a requirement tag, tags are getting duplicated.
4. After creating a tag, in PM tool database, requirement contents are not found for the tag.
5. Unable to delete the tag of the previous tagged requirements.
6. Unable to update the requirement content for existing tag.
7. Section no. for all the sections to be corrected in word editor.
8. All Para numbers should be given as Para number(eg.x.x.x.1) for sec no(x.x.x) and further sub Para to be given as x.x.x.1.1
9. Comments given for SRS documents not get saved properly even after it shows data saved successfully.
10. Unable to edit the document properly, many times.

2. OBSERVATIONS IN PM TOOL:

1. Baseline requirements – Tag that has to be baselined is not listing in 'Tags' drop down menu, in Create baseline window, for the tags that are generated through word editor and approved.
2. While creating child task, some old parent tasks with tags is not getting listed in parent task selection option, but same tags appear in requirements list window as baselined.
